

A Question of Angles

Aim:

Navigate through the maze from one circle to the other.
You can start from and finish on either of the circles.

Rules:

1. Move through the maze by either jumping up to an overlapping triangle or jumping down to a triangle underneath.
2. You must jump up and jump down in an alternating manner. For example, if you have jumped up, the next move must be to jump down.
3. Black shapes block your path and you cannot cross them.

Note: There are a few different ways to reach the end - find them all!
