

Revolving Doors

Aim:

Find your way from one "X" in a square to the other. You can start from and finish on either of the squares.

Parts of the maze:

- White area: path
- Circles with 4 lines: revolving doors

Rules:

1. Walk along the paths in any direction you like.
2. Revolving doors turn in a specific sequence: right, straight, left. That means, the first time you reach a revolving door you must turn right. The next time you reach a revolving door, continue straight. The next time you reach a revolving door, turn left. Then, start the sequence again.
3. If you have already passed through a revolving door once, you can only pass through it again if you have passed through a different one in between.

HINT: You can solve the maze from one direction only.
